Maritime safety, security and marine environmental protection in the Black and Caspian Sea Regions

PROJECT DURATION: 2017-2021
BUDGET: €4 million
PROJECT WEBSITE:

Brief Description

The project aims to improve maritime safety and security, and to prevent marine pollution in the region. It does so by supporting the efforts of coastal states in implementing relevant international legislation, approximating their regulatory frameworks with EU legislation and improving the performance of their maritime activities.

Countries covered: Azerbaijan, Georgia, Iran, Kazakhstan, Moldova, Ukraine, Turkey and Turkmenistan

Objectives

- Improved maritime safety
- Improved security of ships and port facilities
- Reduced pollution of the marine environment
- Improved level of maritime training and qualification of seafarers
- Improved living and working conditions on board ships
Actions in brief

The project conducts a multitude of activities designed to meet its objectives, namely:

- Workshops, seminars and studies
- Operational support (on-site actions, provision of services including drafting of legislation, pilot projects)
- High-level seminars at national level with parliamentary committees, to facilitate the adoption/ratification of updated legal framework
- Targeted bilateral assistance

Activities are conducted under seven components:

- Flag state implementation
- Port state control
- Vessel traffic monitoring and implementation systems
- Protection of the marine environment
- Human element
- Security of ships and port facilities
- Bilateral activities
